Abstract

The abstract should be a single paragraph of no more than 250 words, summarising the motivation, methodology, key findings, and significance of the work. It must be self-contained and understandable without reference to the main text. Do not include citations, undefined abbreviations, or footnotes in the abstract.

Keywords: *keyword one; keyword two; keyword three; keyword four; keyword five*

1. Introduction

State the problem, motivation, and contribution of the paper. Clearly identify the research gap and how this work addresses it. End the introduction with an explicit statement of contributions, e.g.:

- Contribution one.
- Contribution two.
- Contribution three.

The paper is organised as follows. Section 2 reviews related work. Section 3 describes the proposed methodology. Section 4 presents the experimental results. Section 5 concludes the paper.

2. Related Work

Position this work against prior literature. Group related studies thematically rather than listing them chronologically. Conclude with a clear statement of the gap that this paper addresses (Surname, 2026).

3. Methodology

Describe the proposed approach, system architecture, dataset, or experimental setup in sufficient detail for reproducibility.

3.1. System Overview

Use subsections to organise the methodology logically.

3.2. Implementation Details

Describe tools, parameters, and configurations used.

4. Results and Discussion

Present quantitative and/or qualitative results. Use tables and figures as needed.

Table 1: Example table caption.

Metric	Baseline	Proposed
Accuracy (%)	85.2	92.7
F1-score	0.83	0.91
Latency (ms)	120	95

Discuss the implications of the results, limitations, and comparison with existing approaches.

5. Conclusion

Summarise the key findings and their significance. State limitations and suggest directions for future work. Do not introduce new material in this section.
